WHO WE ARE

About Planning & Coordination

The planning wing is responsible for ensuring effective planning, development of program strategy, and supporting change in the policy environment through advocacy, lobbying and partnership with donor agencies, the private sector, NGO's and other networks. Additionally, we are responsible for co-planning the development and implementation of the monitoring and evaluation systems. They also contribute towards increased educational research as inputs into QAED policy and management strategies.

WHAT WE CAN OFFER

Building On Our Partnerships

Preparation of training plans, academic & training calendar, concept notes, PC-1, etc.:

The wing assists in the preparation of training plans, academic and training calendars, concept notes, and project proposals (PC-1). These documents are essential for planning and implementing educational programs and projects.

School Leadership Development Program (SLDP)

This program aims to enhance the leadership skills and capabilities of school administrators and principals. Through training, workshops, and mentoring, the SLDP equips school leaders with the necessary knowledge and tools to effectively manage and lead educational institutions.
